► Unrivaled Performance & Unified Platform

Conservice is the only vendor to exceed 7.0 on all six metrics (Implementation 7.5, Support 8.2, Sat 8.1, ROI 7.7, NPS 8.3, Renewal 8.2) – the operational gold standard.

Customers rave about Conservice's unified platform—billing, integrations and analytics live in one intuitive UI, eliminating tool-sprawl and manual hand-offs.

	CONSERVICE® N=14		All Vendors Average N=29		Yardi Energy N=8	entrata N=3	REALPAGE® N=2	appfolio N=2
Implementation Experience	7.5	✓	6.9	✗	7.0	7.0	2.0	6.0
Customer Support Quality & Responsiveness	8.2	✓	7.2	✗	6.4	7.3	4.0	7.0
Overall Satisfaction	8.1	✓	7.2	✗	6.5	7.3	3.5	7.5
Received ROI/Value	7.7	✓	6.6	✗	6.6	6.3	5.0	6.5
Likelihood of Recommending	8.3	✓	7.4	✗	7.0	6.7	4.0	7.0
Renewal Intentions	8.2	✓	7.6	✗	7.0	7.7	4.5	9.0

Our portfolio spans RealPage, Yardi, and Entrata. We previously used PMS utility services from Yardi and RealPage, which led to resident complaints and missed opportunities. After evaluating Conservice, we standardized on their platform and are very satisfied. —CTO • Greystar

Embedded Technology & Specialized Expertise

Three strategic pillars underpinning Conservice's market leadership

- 1 Native PMS Embedding**

Conservice's platform plugs directly into Yardi, Entrata, MRI and AppFolio, synchronizing meter reads, invoices and resident charges in real time—no manual exports or batch uploads required. This bidirectional sync eliminates data-reconciliation errors and ensures billing accuracy from the meter to the general ledger. As a result, clients report up to 50 % faster implementation times since there's no custom middleware or nightly file transfers to maintain.

- 2 Utility-Focused Domain Mastery**

Rather than a generic add-on, Conservice includes in-house expertise on local and state regulatory frameworks, complex rate structures and multi-tenant meter protocols. A dedicated compliance team continuously updates billing logic to reflect tariff changes, avoiding penalties and surprise audit findings. Clients benefit from fewer disputes, more predictable cash flows and improved resident satisfaction thanks to transparent, rules-based billing.

- 3 Customer-First, Extensible Architecture**

An open-API framework and modular design let clients bolt on advanced analytics, carbon-tracking and IoT-enabled leak detection without disrupting core billing workflows. This agility is paired with a white-glove service model—local market specialists, proactive health checks, and detailed onboarding playbooks—to ensure every new integration or add-on is delivered on time and on budget. The result: rapid feature rollouts, zero downtime, and a true platform that grows with client needs.

We value the experience of having utility tools embedded in our systems to avoid data silos and reduce administrative overhead.
—VP, Operations • Lantower Residential

► Client Voices: Proof-Points for Every Pillar

They were deemed by the decision-making group to be 'best in class.' The property-management-system tools built-in weren't the best fit, as that wasn't what they did best. **—Director, Utility Management · AMLI Residential**

We chose Conservice because of several strategic and operational benefits—scalability, automation, cost-recovery, and expense management. **—VP of Technology · AMLI Residential**

They were the most responsive vendor, and we were under a time crunch to implement a solution. Their experience in our service area and your personal connection with the representative sealed the deal. **—Manager, Asset Management & Investments · Pacific Reach Properties**

We chose Conservice for its scalability, automation, and strong integration with our PMS. It gives us a comprehensive and reliable solution for multifamily properties. **—VP, Operations · Lantower Residential**

We chose this platform because a client had used it previously and we trusted their judgment. It integrated well with our PMS and had open-API options that allowed us to connect with other reporting tools we use. **—Senior Energy Manager · Cushman & Wakefield**

The main reasons were their experience, customer service, and invoice-capture package, which made it easy and scalable for our entire portfolio. **—Senior Energy Manager · Cushman & Wakefield**

The platform is easy to use and dedicated to utility recovery. We'd love deeper reporting and analytics, along with a dedicated account manager. **—SVP, Property Management · Capreit**

Where does your organization fall between using a dedicated utility mgmt vendor vs. utility functionality embedded in your PMS?

Insights | Preferred Utility Management System

Current Vendor	Score	You characterized your organization's utility platform preference as a ___. Please explain why.
 CONSERVICE®	10	To improve efficiency and streamline our processes, we prefer to work with an all-inclusive, one-stop-shop vendor. -Managing Director, Asset Management at TruAmerica
 CONSERVICE®	10	I do not have a preference for whether the solution is part of the PMS or a stand-alone system; what matters most is the functionality it provides. -COO at Cardinal Group Companies
 CONSERVICE®	10	Our portfolio spans RealPage, Yardi, and Entrata. We previously used PMS utility services from Yardi and RealPage, which led to resident complaints and missed opportunities. After evaluating Conservice, we standardized on their platform and are very satisfied. -CTO at Greystar
 CONSERVICE®	9	Nearly all utility management functions are handled within the Conservice platform. Resident utility payments are the only crossover point with Entrata. -Director, Utility Management at AMLI Residential
 CONSERVICE®	7	We are comfortable working with a third-party provider to handle utility billing laws and regulations, as well as manage the entire implementation and ongoing processes. -Asset Manager at Adara Communities
 CONSERVICE®	7	We value the experience of having utility tools embedded in our PMS. However, we have found that dedicated utility management vendors often offer more robust functionality, advanced reporting, and better support. A dedicated platform gives us flexibility, scalability, and deeper insights into utility recovery and conservation efforts. Nevertheless, full integration with our PMS is still a key requirement, so we prioritize vendors who can seamlessly connect with our existing systems to avoid data silos and reduce administrative overhead. -VP, Operations at Lantower Residential
 CONSERVICE®	7	It's less hands on involvement for the onsite team; we have enough to handle on a day-to-day basis. -Community Manager at RPM Living
 CONSERVICE®	7	Our primary systems include third-party providers like Conservice, AUM, etc. -Property Accountant at Redacted

Insights | Preferred Utility Management System

Current Vendor	Score	You characterized your organization's utility platform preference as a __. Please explain why.
 CONSERVICE®	6	Even though Conservice meets our basic needs, it would be preferable to have this functionality integrated directly within our property management system. -VP of Technology at AMLI Residential
 CONSERVICE®	6	We prioritize convenience and ROI for both our team and customers. Yardi doesn't offer an ideal solution, but if we had Entrata, we might use the PMS. In our experience, third-party platforms tend to integrate better with the hardware they're designed for. -Director of Technology at Avanti Residential
 CONSERVICE®	5	There is an issue with two-factor authentication when setting up bill pay for certain accounts. -Senior Energy Manager at Cushman & Wakefield
 CONSERVICE®	5	Despite some advantages to integration with PMS software, we've found it more effective to outsource utility functions to specialized vendors, whose expertise results in better accuracy and efficiency than built-in tools. -SVP, Property Management at Capreit
 CONSERVICE®	5	Our operations include Conservice and Yes Energy at several sites, while our third-party property managers use the integrated Yardi option. -Manager, Asset Management & Investments at Redacted
 CONSERVICE®	2	The more we can automate and manage costs, the better. Embedded tools also offer better visibility into utility costs for residents. -President & COO at Redacted

OTHER

Current Vendor	Why did your organization choose your vendor over alternative solutions? What were the key differentiators? Please explain. If you evaluated any other solutions, please provide an explanation why they fell short.
 CONSERVICE®	We selected this platform because a client had prior experience with it, and their onboarding support was critical. The availability of API integrations with our other reporting tools also played a major role. -Senior Energy Manager at Cushman & Wakefield
 CONSERVICE®	Consistency, efficiency, and scalability are top priorities for us. Conservice generates monthly resident bills that include rent and extra charges, while keeping us informed on local regulations and market-specific details. -Managing Director, Asset Management at TruAmerica
 CONSERVICE®	Our decision to go with Conservice was driven by multiple strategic and operational benefits. These included centralized utility billing, compliance, risk management, expense management, cost recovery, and automation; all aligning with our portfolio goals. -VP of Technology at AMLI Residential
 CONSERVICE®	This platform has proven to be a strong fit for student housing, which often includes multiple leases per unit. The billing quality is high, and the company is both professional and responsive to customer service needs. -COO at Cardinal Group Companies
 CONSERVICE®	In our experience, while customer service could have been better, Conservice has demonstrated industry leadership through their efficient, timely, and uninterrupted billing and reporting processes. -Asset Manager at Adara Communities
 CONSERVICE®	We appreciate the platform's user-friendliness and focus on utility recovery. The reporting is excellent, and we benefit from having a dedicated account manager. -SVP, Property Management at Capreit
 CONSERVICE®	Responsiveness was the deciding factor, as we were working under tight deadlines. Pricing across vendors was similar, so service area and our connection with the rep ultimately guided our choice. -Manager, Asset Management & Investments at Redacted
 CONSERVICE®	Key factors in our decision included their experience, strong customer service, and a utility package that worked well across our entire portfolio. -Director of Technology at Avanti Residential
 CONSERVICE®	We went with Conservice due to its scalability, automation, and seamless PMS integration. Competing vendors lacked similar reporting and support or required more internal effort. Conservice offered a more comprehensive and reliable solution for multifamily properties. -VP, Operations at Lantower Residential

Current Vendor	Why did your organization choose your vendor over alternative solutions? What were the key differentiators? Please explain. If you evaluated any other solutions, please provide an explanation why they fell short.
	Conservice is the service used by our entire portfolio. We didn't evaluate any other solutions, as the community already had Conservice in place when we assumed management last year. -Community Manager at RPM Living
	Our use of Conservice began early on, and we've simply continued with them without reevaluating alternatives recently. -President & COO at Redacted
	Our decision-making team determined Conservice to be "best in class." Most of our comps used them without major issues. PMS platforms with built-in utility tools didn't meet our needs as effectively. -Director, Utility Management at AMLI Residential
	Service quality was the deciding factor. Conservice performs all the functions claimed by PMS systems—but does them better. -CTO at Greystar

How would you rate your vendor on the following aspects?

How critical is your vendor to your organization's core operations?

Extremely critical: Essential to operations Critical: Important to operations Somewhat critical: Useful, but not essential Not critical: Easily replaceable

Current Vendor	Strategic Importance	You suggested that your vendor is _____ to your organization's core operations. Please explain why you characterized your vendor's strategic importance as such.
 CONSERVICE®	Extremely Critical	Conserve plays a vital role in our daily operations. Their industry expertise and familiarity with our national management partners are extremely beneficial. -Managing Director, Asset Management at TruAmerica
 CONSERVICE®	Extremely Critical	Utility consumption represents a significant expense for property management companies. Maximizing recovery absorption is essential to optimize cost efficiency. -SVP, Property Management at Capreit
 CONSERVICE®	Extremely Critical	It's essential for us to correctly collect the utilities from each resident. -Community Manager at RPM Living
 CONSERVICE®	Extremely Critical	We have relied on Conserve for so long that nobody would know how to do it otherwise. It's plug and play at this point. We need to have a reliable way to bill utilities to residents. -President & COO at Redacted
 CONSERVICE®	Critical	By ensuring timely utility payments, essential services like electricity and water stay active, helping us avoid late fees. -Senior Energy Manager at Cushman & Wakefield
 CONSERVICE®	Critical	We require a resident utility management solution that works for both student and conventional housing. While it doesn't have to be Conserve, having a solution in place is essential. -COO at Cardinal Group Companies
 CONSERVICE®	Critical	It is used across our entire portfolio and integrated into all of our leases. We also use it to manage all vendor contracts, a process they have made easy to execute. -Director of Technology at Avanti Residential
 CONSERVICE®	Critical	Conserve is critical to our operations because it ensures accurate utility billing, recovery, and compliance across our portfolio. Without it, we would face significant operational gaps, increased manual workload, and a risk to billing accuracy and resident satisfaction. It plays a key role in maintaining NOI and reducing utility-related delinquencies -VP, Operations at Lantower Residential

Current Vendor	Strategic Importance	You suggested that your vendor is _____ to your organization's core operations. Please explain why you characterized your vendor's strategic importance as such.
 CONSERVICE®	Critical	Utilities is the third largest operating expense. The need and want is to recover as much of that expense as possible from residents. Conserve is instrumental in that goal. -Director, Utility Management at AMLI Residential
 CONSERVICE®	Critical	Their invoice processing tools save substantial time for our Operations and Accounting teams, and their billing services are also efficient. -Property Accountant at Redacted
 CONSERVICE®	Somewhat Critical	As a real estate developer, owner, and operator, our core functions involve multifamily property management, enhancing resident experience, and maintaining asset performance & profitability. Conserve supports these tasks but doesn't generate revenue or drive leasing strategy. -VP of Technology at AMLI Residential
 CONSERVICE®	Somewhat Critical	They offer a good service, but other companies have delivered similar results. Finding a replacement wouldn't be difficult if needed. -Asset Manager at Adara Communities
 CONSERVICE®	Somewhat Critical	This helps us enhance NOI at the asset level and recover common area expenses. While not absolutely critical, it does bring in additional revenue. -Manager, Asset Management & Investments at Redacted
 CONSERVICE®	Somewhat Critical	If Conserve ceased operations tomorrow, we would switch to a PMS module as a fallback option. -CTO at Greystar

Insights | Likelihood of Recommending

Current Vendor	Score	You rated your likelihood to recommend your vendor to a peer at a similar organization as a _____. Please explain why.
CONSERVICE	10	They continue to set the standard in the industry with exceptional responsiveness. -Managing Director, Asset Management at TruAmerica
CONSERVICE	10	We have seen them be very responsive both to us as a client and to our residents when there are any sort of issues to resolve. They are generally very accurate, and they also proactively look for incentive opportunities for us with the local utilities to help us save. -CTO at Greystar
CONSERVICE	9	The platform stands out for being more affordable than other options and is user-friendly. -Senior Energy Manager at Cushman & Wakefield
CONSERVICE	9	I've been satisfied with their billing, metering solutions, and the quality of their analytical reporting. -SVP, Property Management at Capreit
CONSERVICE	8	Conservice has consistently delivered reliable performance in utility billing, expense recovery, and overall utility management. This operational support is the primary reason I would recommend them. -VP of Technology at AMLI Residential
CONSERVICE	8	They are a solid choice for companies looking to outsource utility management. -COO at Cardinal Group Companies
CONSERVICE	8	Although I've had some concerns with their customer service, I still consider them to be the current industry leader. -Asset Manager at Adara Communities
CONSERVICE	8	They offer the complete package we need for utility management. It saves us a lot of hassle by eliminating the need to work with multiple companies. They understand our business better than many other vendors and actually listen when we raise concerns. -Director of Technology at Avanti Residential
CONSERVICE	8	Reliable partner, offering strong automation, seamless integration, and consistent support. While no solution is perfect, they handle complexity well and reduce our internal workload. I would recommend them to peers, especially those managing larger portfolios or looking to improve utility recovery. -VP, Operations at Lantower Residential
CONSERVICE	8	Support structure is strong, and our dedicated account manager is highly responsive when needed. -Community Manager at RPM Living
CONSERVICE	8	Believe they are the best at what they do. They are not perfect, no vendor/software is. But do believe they are best in class. -Director, Utility Management at AMLI Residential
CONSERVICE	8	Conservice is easy to work with, though there are areas where they could improve. -Property Accountant at Redacted
CONSERVICE	7	They are a reliable operator who delivers on their commitments. However, there may be strategic reasons to select a different vendor. -Manager, Asset Management & Investments at Redacted
CONSERVICE	7	It functions well overall, making it a viable option. However, we haven't explored more cost-effective alternatives that might serve us even better. -President & COO at Redacted

Insights | Customer Satisfaction Relative to Alternative Solutions

Current Vendor	Score	On a scale from 0 to 10 (0=Much Worse, 10=Significantly Better), you rated your vendor as a ____ relative to alternatives.
 CONSERVIVE	10	Their responsiveness and knowledge of local regulations set them apart. They also regularly identify meaningful areas for operational improvement. -Managing Director, Asset Management at TruAmerica
 CONSERVIVE	10	With PMS we often got errors, and very slow response back to fix them. -CTO at Greystar
 CONSERVIVE	9	They stand out as the industry leader among third-party providers, particularly in quality, reporting, and service delivery. -COO at Cardinal Group Companies
 CONSERVIVE	9	I believe they are best in class at what they do. They have been around for a while and have steadily grown. They now partner with most of the big players in the industry. Some of their biggest competition is utility management built into existing PM software. But with all of those the utility management piece was just an add-on and not really what they focused on nor did well. -Director, Utility Management at AMLI Residential
 CONSERVIVE	8	Their team is easy to engage with and responsive, which is valuable given the number of providers offering similar services. Frequency and quality of interaction become key differentiators. -Manager, Asset Management & Investments at Redacted
 CONSERVIVE	8	Their comprehensive system meets all our operational requirements. The integrated platform manages contracts, vendors, utilities, and leases effectively, and their competitive pricing has delivered great ROI for our organization. -Director of Technology at Avanti Residential
 CONSERVIVE	8	They perform better than most alternatives we have evaluated, particularly on the subjects I mentioned earlier. While there is always room to improve in areas like user experience or reporting customization, overall, they deliver more value and fewer headaches than other options we have considered. -VP, Operations at Lantower Residential
 CONSERVIVE	8	Over my 25-year career, most of the properties I've managed already used Conserve. -Community Manager at RPM Living
 CONSERVIVE	8	Compared to other systems, it's easier to use. Their website is detailed, and customer service is quick to respond. -Property Accountant at Redacted
 CONSERVIVE	7	While Conserve offers more advantages than most competitors, it doesn't dramatically outpace the rest. Its strength lies in the breadth of services offered. -VP of Technology at AMLI Residential
 CONSERVIVE	6	Based on our evaluations, the performance differences between this and other platforms are minimal, with little differentiation in overall value. -Asset Manager at Adara Communities

Insights | Willingness to Pay

Current Vendor	I'd be willing to pay more if my vendor introduced _____. Please explain.
 CONSERVICE	At this time, no changes are recommended. The current setup meets our needs. -Managing Director, Asset Management at TruAmerica
 CONSERVICE	There's nothing more to add. The service already feels comprehensive and well-aligned with our utility management requirements. -SVP, Property Management at Capreit
 CONSERVICE	Better reporting in addition to AI capabilities. Their reports can be cumbersome and difficult to get to the data that is needed to make a decision. I would like reports to get cleaned up and easier to use and visualize. Maybe even partner with Microsoft and have some kind of BI dashboard or build something of the sort in house. Any kind of AI assistance built in would be a bonus. -Director, Utility Management at AMLI Residential
 CONSERVICE	I'd pay more for AI tools that auto-summarize contracts and respond to specific contract-related queries, as well as deliver real-time insights to improve decision-making and operational efficiency. -Director of Technology at Avanti Residential
 CONSERVICE	Implement carbon accounting or a better method to ensure data quality controls are in place for exports. -Senior Energy Manager at Cushman & Wakefield
 CONSERVICE	I'd be willing to pay more for a turnkey hardware solution that includes procurement, installation, and maintenance, especially one that integrates with or upgrades existing meters. -VP of Technology at AMLI Residential
 CONSERVICE	Conservice currently meets all of our operational needs, so we do not see a demand for additional features at this point. -Asset Manager at Adara Communities
 CONSERVICE	I'd be open to spending more for a more intuitive, self-service analytics dashboard that provides real-time insights and comprehensive visibility into trends, anomalies, and recovery performance at both portfolio and property levels. This enhanced functionality would empower our teams to make faster, data-driven decisions without needing to request custom reports or manually review static files. -VP, Operations at Lantower Residential
 CONSERVICE	I'm satisfied with the service Conservice provides and am not seeking additional features. -Community Manager at RPM Living
 CONSERVICE	A portal where we could upload missing invoices to help pay outstanding utilities faster. -Property Accountant at Redacted
 CONSERVICE	I would consider paying more for intelligent analytics that detect system inefficiencies and recommend capital improvements to reduce utility expenses, such as flagging running toilets or HVAC issues. The data needed to build this already exists. -COO at Cardinal Group Companies
 CONSERVICE	I'm not interested in paying more at this point, nor am I looking for anything else from Conservice. -President & COO at Redacted

Areas of Improvement & Management Recommendations	35
--	-----------

Insights | Area(s) of Opportunity

Current Vendor	Thinking about the entire utility management software market, what do you see as the biggest opportunity for innovation, particularly areas for technological improvement?
 CONSERVICE®	AI-driven billing audits that can dynamically identify and resolve mistakes or errors automatically, reducing manual intervention and improving accuracy across utility management processes. -VP of Technology at AMLI Residential
 CONSERVICE®	Significantly reduce the time and effort required for onboarding when companies transition between property management companies. The current timeframe of over 30 days is excessive in today's fast-paced business environment and creates substantial operational challenges and disruptions during the transition period. -COO at Cardinal Group Companies
 CONSERVICE®	Developing more reliable metering equipment that requires minimal maintenance intervention. Current metering systems are too unreliable and demand excessive maintenance attention, including frequent battery changes, software updates, and meter replacements. The additional operational costs and time investment required significantly diminish the cost-benefit advantages of using sub-metered equipment compared to traditional RUBS (Ratio Utility Billing System) approaches. -Asset Manager at Adara Communities
 CONSERVICE®	Perhaps a feature that educates residents on how to reduce their own utility bills or the overall building expenses. -Manager, Asset Management & Investments at Redacted
 CONSERVICE®	Artificial Intelligence technology that provides a platform where we can get answers immediately by using natural language queries. This would enable real-time information access and decision-making through conversational interfaces rather than navigating complex menus or reports. -Director of Technology at Avanti Residential
 CONSERVICE®	Implementing real-time utility data access systems combined with advanced predictive analytics capabilities. These technologies would provide immediate visibility into utility consumption patterns, enable proactive maintenance scheduling, and support data-driven decision-making for optimizing operational efficiency and cost management across property portfolios. -VP, Operations at Lantower Residential
 CONSERVICE®	Utility management deals with loads and loads of data. The quicker and easier a software can make data analysis the better. It is data analysis that leads to key decisions being made. AI may be able to help with this in addition to providing general assistance in the navigation of any software's customer facing portal. -Director, Utility Management at AMLI Residential
 CONSERVICE®	A software that could generate accruals for missing utilities. -Property Accountant at Redacted
 CONSERVICE®	If Conservice can include waste management cost optimization, and other building costs into their solution we would buy those modules. -CTO at Greystar
 CONSERVICE®	There could be an easy resident portal that shows historical trends. -Community Manager at RPM Living
 CONSERVICE®	If the utility management could all be done remotely and uploaded directly into Yardi seamlessly billing the residents, that would be beneficial. -President & COO at Redacted

Current Vendor	Outside of lowering price, what does your vendor need to improve? If you were speaking with your vendor's management team, what would you tell them to focus on?
 CONSERVICE®	Robust ESG reporting and a clearly defined data quality process are essential to ensure accuracy and reliability during data exports. -Senior Energy Manager at Cushman & Wakefield
 CONSERVICE®	The implementation of WasteX has been challenging, and we have not experienced any significant benefits from the program so far. -Managing Director, Asset Management at TruAmerica
 CONSERVICE®	Billing accuracy and faster customer service response times are key areas needing attention. -VP of Technology at AMLI Residential
 CONSERVICE®	Seamless transitions of properties when onboarding onto an existing property management company's platform. We had numerous scenarios where the process is so manual and error-ridden, properties had utilities shut-off during transition because the process is so manual/cumbersome. -COO at Cardinal Group Companies
 CONSERVICE®	I would tell them that they're doing a good job specializing in their field and they should continue to keep up with new technology and innovations. -Asset Manager at Adara Communities
 CONSERVICE®	We've run into issues with ESG reporting in certain jurisdictions that could use more attention. -SVP, Property Management at Capreit
 CONSERVICE®	My advice would be to maintain excellence in small details and improve responsiveness, especially with strong competition in the market. -Manager, Asset Management & Investments at Redacted
 CONSERVICE®	Honestly, they've been solid and great, and integrating with AI would be the only thing I'd like to see. Their contract management platform is clunky, so a better UI would be beneficial. -Director of Technology at Avanti Residential
 CONSERVICE®	Focus on improving transparency, reporting flexibility, and user experience. -VP, Operations at Lantower Residential
 CONSERVICE®	I'm content with their service. We stay well informed about the billing cycles for residents. -Community Manager at RPM Living
 CONSERVICE®	I would like to see better integration with Yardi to make the entire process more automated. -President & COO at Redacted
 CONSERVICE®	Beyond reporting and AI improvements, billing disputes and expense recovery processes need attention. Navigating utility company refunds is difficult, but if Conserve wants to lead the field, they must streamline this process. -Director, Utility Management at AMLI Residential
 CONSERVICE®	The ability to locate and process missing invoices faster would be a valuable improvement. -Property Accountant at Redacted
 CONSERVICE®	Expanding into utility-adjacent services would be a logical next step. -CTO at Greystar
